A NEW WAY TO TRANSCRIBE

FIDELITAPE (MP-100)

PATENT PENDING

(with Total Foot-Pedal Control & Automatic Volume Control)

Designed from the bottom up only for transcribing . . .
for getting voice recordings from tapes to paper . . . this
precision machine fills a long-unsatisfied business need.

A significant step forward in professional, business and Government use of tape-recorded voice.

At last . . . a Transcriber is available which solves the problems of translating tape recordings of conferences, speeches, proceedings, interviews and telephone conversations from tape to paper.

FIDELITAPE plays tapes made on any standard recorder. Its controls are unusually versatile, and engineered specifically for transcribing. **FIDELITAPE** provides an indispensable communication link for all business and professional people who use tape.

FIDELITAPE provides secretary simple transcriber operation for the office. After plugging in the Foot Pedal and Ear Phones, and adjusting the volume control, your secretary is ready for work. Her hands stay on the typewriter until the tape has been transcribed.

FIDELITAPE becomes your secretary's constant office companion — an accepted part of her tool kit as well as an eye-catching complement to your office decor. It gives her a chance to accept transcription as a routine part of her job, instead of an unpleasant chore to be put off until last.

And because **FIDELITAPE** stays in the office, there was no need to compromise operating efficiency for size. Every component is as husky as the job demands.

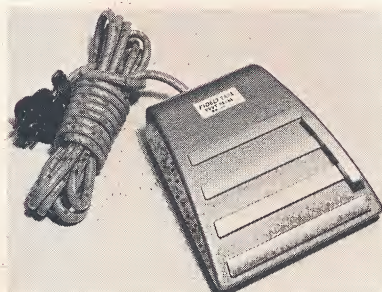

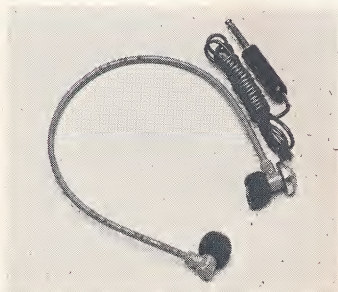

Here are *FIDELITAPE's* outstanding features:

COMPLETE FOOT PEDAL CONTROL — **FIDELITAPE** responds instantly to your secretary's commands for backspace, start and stop. Her hands set her best pace on the keyboard and continue uninterrupted.

TAPE COMPATIBILITY — **FIDELITAPE** accepts any size reel up to 7 inches, has three standard speeds, and will play either full track or half track recordings. (Quarter track and stereo are available on special order.)

AUTOMATIC VOLUME CONTROL — The first in the transcribing industry — takes over the job of adjusting volume level. Your secretary sets the volume level once to suit her transcribing pleasure, and it stays, regardless of subsequent volume level changes in the recording.

AUTOMATIC TAPE CUTOFF — At the end of reel, the tape is automatically stopped, all moving parts are disengaged, and the line power is turned off. There's no possibility of flat spots or other injury to the rubber idler wheels.

CONSTANT TAPE SPEED — A heavy fly wheel, precision capstan drive, large hysteresis-wound motor and fine-tolerance machining of all moving parts assure exceptionally low flutter, silky transport past the play back head, and accurate speed — regardless of line voltage fluctuations.

FOUR-DIGIT FOOTAGE COUNTER — Eliminates any chance for confusion when thin tapes pass the 1,000-foot mark. The counter will not register the same number twice from beginning to end of any tape.

MOBILITY — **FIDELITAPE** can easily be moved from desk to desk. It is as compact as a manual typewriter.

DEPENDABILITY — To assure you that **FIDELITAPE's** exceptional operating ease will continue to serve your office long after you receive it, all circuits are transistorized, design has been intentionally kept simple, and all mechanical linkages are more rugged than necessary.

OUR WARRANTY

We protect our investment by protecting yours. If the machine fails to live up to your expectations, for any reason, during the first 30 days, we'll refund the full purchase price. Mechanical adjustments will be made at no charge for 90 days. All components are warranted for 12 months, including replacement labor.

We're deadly serious about this.

And, since our reputation depends on consistent quality, each machine is thoroughly tested before delivery. **FIDELITAPE** had to earn its debut, and we make sure each production transcriber meets our rigorous design standards.

SPECIFICATIONS

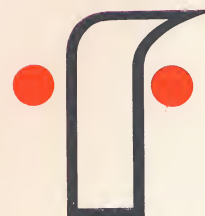

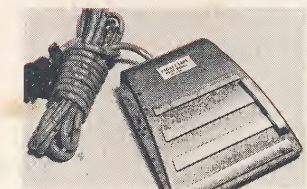

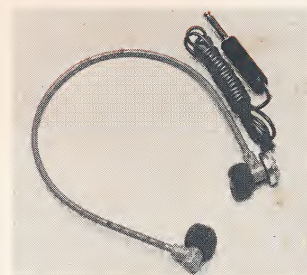

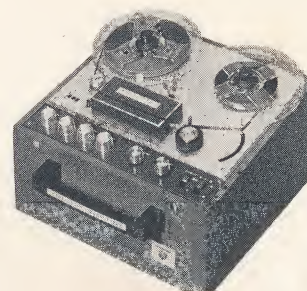

- Line Voltage 117 V, 50 and 60 cycle
- Speeds $7\frac{1}{2}$, $3\frac{3}{4}$ and $1\frac{7}{8}$ ips
- Frequency Response Tailored to voice intelligibility
- Wow and Flutter2% @ 7.5 ips
- Tape Tracks Two (Four on special order)
- Playing Time Up to 12 hours, depending on tape
- Fast Forward and Rewind 2 min. 45 sec. (1200 feet)
- Output 2.5 watts, balanced for headset listening

CONTROLS

- Footswitch Backspace, start, stop
- Pushbuttons Play, stop, rewind, fast forward
- Knobs Automatic volume control and tone

MOTOR (Heavy-duty Hysteresis-wound)

- Size $8\frac{3}{4}$ " height x $13\frac{1}{2}$ " width x $12\frac{5}{8}$ " depth
- Weight 20 pounds
